## Some Accomplishments

# Assembly and Security Recommendations

## Stacking Brackets

Two sets of mounting brackets can be stacked if a shelf is bolted between the two sections of drawers. Ex.: 36" + 18".

R5XEE-2008

DRAWER IN SHELVING

## Assembly

Assemble using simple tools in three easy steps :

The minimum space required for drawers depends on the height of the mounting brackets.

**Make sure that the shelving structure has been installed in compliance with manufacturer recommendations.**

**Anchoring shelving (particularly single rows) to the floor is mandatory.**

To anchor Spider® shelving units,

SEE PAGE 76

Make sure that the shelving is plumb, square and level.

The shelf above the drawers must be bolted in place (where possible) for added safety.

A shelf must be placed beneath 36" and 48" high mounting brackets. The shelf must be bolted in place where possible.
