

PMC LONE STAR

PMC LONE STAR IS PROUD TO ANNOUNCE **CDRP External & Internal** CREST DIAMETER GAGING SYSTEM

- Inspect crest diameter & ovality of pipe and couplings for API, semi-premium and premium threaded connections.
- Use of the CDRP enhances the overall reliability of your connection when used in conjunction with ring and plug gages.
- CDRP design provides superior performance and reliability over other variable gaging systems.

Tired of having to always re-tighten those loose gage settings?

PMC Lone Star's CDRP has the solution! The design of PMC Lone Star's Crest Diameter Gaging System improves upon the shortcomings of other variable gages, increasing measurement accuracy and efficiency by increasing the reliability of the gage assembly and it's mechanisms. This improved design means less time adjusting and more time spent inspecting product!

Patent Pending

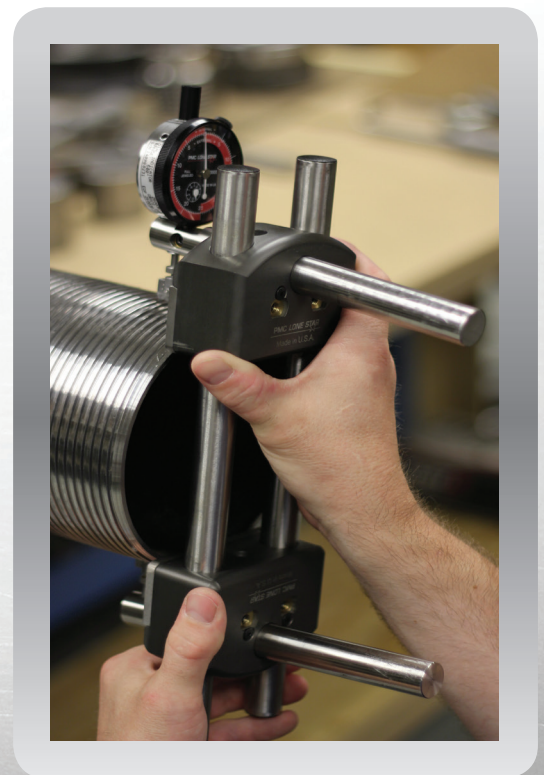

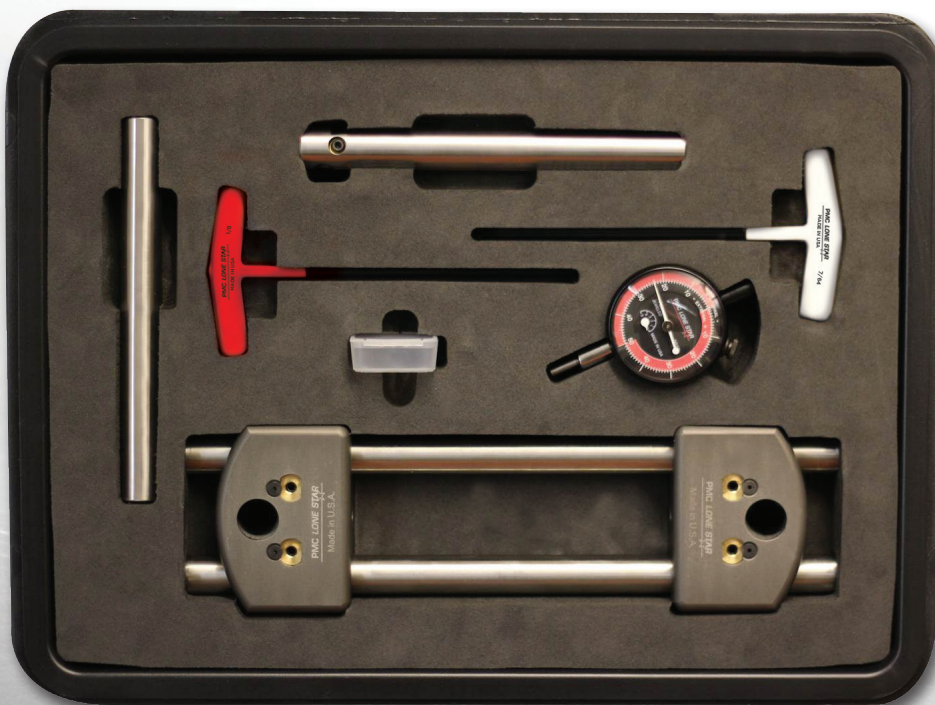

PMC *LONE STAR*

PMC Lonestar is the leader in producing the highest quality and unmatched accuracy of API and premium gages. We continue this tradition as we offer our CDRP Gaging System.

Each CDRP set (external or internal) includes CDRP blocks, rails, upper & lower arms, indicator, t-handle wrenches, contact shoes, accessory storage case and high quality polymer case with laser cut foam for storage and protection of the CDRP components.
