

Vision fixtures for Mitutoyo systems

Fixturing made simple

The Renishaw QuickLoad™ corner fixture is designed to ensure repeatability and provide secure work-holding for any size, shape or type of part for measurement on your vision system. Hold even the smallest of parts in a wide variety of ways while maintaining a clear view of the part.

Features on the QuickLoad corner and acrylic base plates allow for increased speed and accuracy when exchanging plates and set-ups on your machine:

- **Mounting holes** allow users to attach the QuickLoad corner to the vision stage, ensuring a secure and stable position.
- **Magnets** on the QuickLoad corner frame and pins in the acrylic base plates means the two lock into the same position every time.

Hold virtually anything

Renishaw has a wide selection of modular metrology fixturing components, designed to hold even the smallest of parts, allowing for maximum visibility and probe access without obscuring any critical features.

Cut inspection time

Keep your parts set up on multiple plates, switching on and off the machine within seconds. This minimises down time waiting for fixturing to be set up. Both modular and custom plates can be used on the QuickLoad corner, for even greater flexibility.

Made for easy viewing

Serrations are present on the edges of the QuickLoad corner. Parts can be inspected easily when mounted directly against these serrations using Renishaw fixture clamping components, which allow complete access around your part.

Why use a Renishaw QuickLoad™ corner?

- Load and unload plates within seconds using quick release magnets
- Easy to secure to vision stage using mounting holes ensuring repeatable set-ups
- Ideal for multiple users
- Dedicated sub-plates available to save you time
- Flexibility of both modular and custom plates
- Maximise repeatability and reproducibility when using a QuickLoad corner with labelled components and alpha numeric plates
- Short payback period

Plate options

Acrylic fixture base plate

Parts can be placed directly on the acrylic multi-window or multi-hole base plate and are held securely using Renishaw's modular fixturing components, ensuring repeatability and reproducibility.

Quick slide plates

Quick slide plates attach to the QuickLoad corner giving you the ability to secure your parts on or between the slide plates using various Renishaw fixturing components.

Looking for a custom solution?

If our standard range of modular fixturing does not meet your requirements, we can provide custom fixtures for your CMM, vision system, multi-sensor machine or Equator™ gauge for singular or multiple parts. Let us design and create a custom fixture for almost any size, shape, weight or material parts that you need to inspect.

Ask your local sales representative about your custom fixture today or visit www.renishaw.com/customfixture
