11072 (Turret Mount)

Pin Connection

11072-xxx-SA & GP Series

External Thread (Pin) Turret/Tool Post mount tools

SA Series

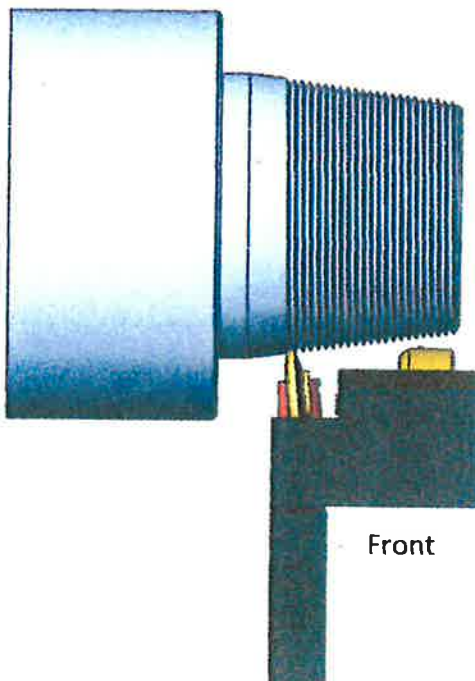

- Direct Turret/Tool Post Mount External Tool. Uses 2.0" OD x .375" wide EPL style wheels.
- Low 3.45" mounting height for machines w/ tight turret index clearance.
- No need for a tool holder adapter.
- Tool profile is more typical of other OD turning tools, reducing the chance of chuck-jaw and back wall clearance issues.
- Rolling forces are directly in line with turret.
- 11072-A-xxx-SA series is a square shank mount. 1.25" shanks are standard. 1.00" thru 1.50" and metric sized shanks are all options.

GP Series

- Turret Mount External Tool. Uses 2.0" OD x .500" wide GP style wheels.
- Same clearance and features as 11072-x-xxx-SA series.

11072 (Tool Post Mounting)

Pin Connection

11072-xxx-SA1 & GP1 Series

- See notes above.
- Alternate Gauge for viewing from back of machine.
