Your interface for **even greater performance**

Two steps to the goal: combine your Integrated Wireless instruments with our multifunctional MarCom Professional software. This versatile interface tool combines data acquisition and data transfer with your data processing. How you process the collected data is entirely up to you, for maximum flexibility, choose from a range of output formats.

Enjoy maximum individuality at the workplace with a free choice of output medium and four output formats:

- Virtual interface box: CAQ/SPC software
- Intelligent Excel® interface: Microsoft® Excel
- Emulation keyboard: any Windows® software
- Text file: flexible data processing

MarCator 1087 Ri
digital indicator

Free Download: Marcom Professional Software

Easily transfer measurement values directly into Microsoft Excel, or via keyboard code into any Windows program or SPC software using a virtual interface box. Scan the QR code or visit: www.mahr.com/marcom

Micromar 44 EWRi digital 3-point inside micrometer with Integrated Wireless

MarSurf M 310 roughness measuring instrument with USB wireless adapter

- **Additional data:** Additional values are transferred to supplementary columns (name, serial number, item number, date and time)
- **Device parameters can now be preset:** reference values (preset, tolerance limits, warning limits in %), as well as, function locks can be queried and changed on the instrument
- **Improved Microsoft Excel functionality:**
 - Easily undo the last data transfer – right in the program with a simple click
 - Adapted column and row names: R1C1 reference style for use with Microsoft Excel as in practice

Powerful and user-friendly due to continual updates!

Perfectly coordinated: MarCom Professional Software is the ideal data transfer for all your quality assurance and production needs. It is perfectly equipped from the Integrated Wireless product line. A number of additional functions offer users maximum convenience when recording and transferring measurements.

3x
faster
configuration

Save time:
conveniently configure your measuring instruments via PC interface and eliminate the need for manually setting the instrument.

99 %
more reliable

Avoid operating errors:
all information is automatically transferred and assigned thanks to the automatic identification of measurements and serial number transfers.

New features:

- IATF ready: transfers and displays the measuring equipment ID and item and serial number to clearly allocate the measuring equipment to the measurements
- Tab settings in up to 3 areas: settings, device parameters and goal
- Scalable measurement value display
- Manually sort the device overview using drag-and-drop

It couldn't be easier!

Scan the QR code and watch the video showing the practical application of the Integrated Wireless handheld measuring devices.

Comprehensive product range with Integrated Wireless

Mahr offers a comprehensive range of measuring instruments with Integrated Wireless data transmission for use in all areas of industrial manufacturing and quality control. The Integrated Wireless range from Mahr delivers accurate measuring results with full mobility. Modern, simple measuring solutions without the limitations of wired technology.

Helios-Preisner to the U.S. Market through Mahr Inc.

Founded in 1940 and part of the Mahr Group since 2022, Helios-Preisner is known for its German-quality precision hand tools and extensive product portfolio. The brand offers a wide range of specialty measuring and inspection tools, including squares, rulers, gauges, micrometers, calipers, and custom solutions for professional trade and precision applications.

We look forward to supporting your team as we bring these exciting product lines to the U.S. market.
Please contact your Mahr representative with any questions regarding product selection, pricing, availability, or sales opportunities.

Marameter | ID/OD gage

Marameter M 36B

Efficient ID/OD checks on the shop floor

"T"-plates give a diameter reading directly across the diameter. A third contact may be used as a side-stop or centralizer

"V"-plates are self-centralizing. Three jaws are used and the measurement is of the distance between the sensitive contact and the chord formed by the two reference contacts.

Measure close to production with the Digimar 816 CLT

Measurements in the thick of the action: This is what the new Digimar 816 CLT is all about: due to its optimized mechanics, has proven itself in the rough and tumble of everyday production. Measure accurately and easily like never before! The new addition to the Mahr height measuring instruments boasts outstanding measuring accuracy and is extremely easy to operate. The Digimar 816 CLT has a practical touch display with extra-large buttons, an integrated PDF memory, wireless data transfer and a wide range of accessories to make your work easier.

Max. length measuring uncertainty:

$$2.0 + L/400 \mu\text{m}$$

(L in mm)

Advantages

- Extra large buttons for quick and reliable execution of functions.
- Reliable measuring results thanks to motorized contacting without manual operator influence.
- Create PDF measuring records directly on the device.
- Wireless data transfer or via USB.
- Free MarCom software to transfer data.

Best ergonomics

Ergonomic handles on both sides have an integrated operating key for the air bearing ensuring the device can be moved accurately and effortlessly on the measuring plate.

\$7,885

Digimar 816 CLT

Pocket Surf IV

Simple to use and easy to read

The Pocket Surf IV is simple to use and easy to read, displaying measurement results of Ra, Rz, or Rmax at a glance. This portable surface finish gage employs Mahr's unique MarConnect universal interface which allows for USB, RS-232 or digimatic output of data.

2191800

Pocket Surf IV complete kit

A wide selection of stands, accessories and application-specific probes are available

Order No.	Product	Details	List Price	Promo Price

The MarSurf M 310 brings added value for mobile roughness measurement

Are you used to using your smartphone to access your data anytime, wherever you are? Mahr's MarSurf M 310 provides you a versatile device for the mobile recording and evaluation of measuring data. Simple operation and a robust design make this Mahr product perfectly suited for use in production, where dirt and dust can clog the instrument.

Including new surface standard DIN EN ISO 21920

Status at a glance

Instrument status at a glance due to two easily visible status LEDs. Depending on the signal color, a measurement is underway, data is being transferred or an error has been detected. Standby mode shows the charging status.

Modern optics, perfect display

A high resolution, backlit 4.3" LCD display ensures precise display of your measuring results. It is operated directly via the touch-screen – just as you are used to with your smartphone.

Traceable results

The MarConnect duplex interface enables the transmission of a measuring equipment ID with each measurement. This makes measuring results traceable.

Robust in every respect

Equipped for virtually any environment: The robust skidded probe system means that the measuring instrument is less vulnerable to vibrations. The PHT probe is easy to clean due to its open skid.

Software with a guaranteed success

With this measuring instrument, you can reliably determine roughness parameters even without expert knowledge or training due to intuitive software, clear menu structures and preprogrammed measuring functions.

MarSurf PS 10

Mobile measuring made easy

The MarSurf PS 10 is the ideal entry level instrument for surface metrology: Its extraordinarily simple and intuitive operation, along with numerous safety functions including the automatic cutoff, make the device as easy to control as a smartphone. Due to its minimal size, it is also perfect for location-independent measurements – vertical, horizontal and even overhead if necessary. Due to the removable drive unit, the MarSurf PS 10 can be used flexibly in production.

The measuring instrument boasts three order options for increased flexibility: with stylus tip 2 µm, 5 µm and also a variant with a transverse drive unit (MarSurf PS 10 C2).

- Intuitive operation: As easy as using a smartphone with a rotatable display
- Creates complete PDF measuring records right in the measuring instrument and data backup as TXT, X3P, CSV and PDF files
- Customized comments for the PDF measuring record entered directly into the MarSurf PS 10
- Easy calibration due to an integrated, removable roughness standard
- Automatic cutoff selection, giving accurate results to any operator

**Including new surface standard
DIN EN ISO 21920**

The MarSurf M 410 is **simple**, **innovative**, and **flexible** for hands-on use.

Mobile recording and evaluation of measuring data has never been easier. The MarSurf M 410 combines convenience and flexibility, much like a modern smartphone. With its practical touch display, integrated PDF memory, innovative accessories, and wireless data transfer, it simplifies your workload. Unique to Mahr, it features automatic filter settings, automatic probe contacting for unmatched measurement reliability, and a magnetic 3-point holder for the probe arm. Freely combinable accessories further enhance process security.

Intuitive operation via touch display

Easy to operate with an intuitive, smartphone-like interface, getting started is quick and straightforward.

Creation of PDFs directly on the device

Practical: The device creates a complete PDF file without the need for additional software or transfer to a computer. Information can be added to the PDF files directly on the device.

Simple alignment of the probe system

The inclination is easy to correct via the menu-driven, graphic instructions.

Possible to separate the display and probe system

Optionally, you can use the measuring instrument as a mini mobile measuring station, for example by simply attaching the display to the wall using the supplied pivoted docking station.

\$9,690

MarSurf M 410 SET

6910290

**Including new
surface standard
DIN EN ISO 21920**

Magnetic probe holder

Probe arms can be changed quickly without tools and with additional protection: The magnetic 3-point holder ensures that the probe will not be broken in the event of a collision; it will be easily released by the magnetic holder.

Importing information using a scanner

Start your measuring program by scanning a QR or barcode. You do not need to enter any profile information as your saved measuring programs are linked with a corresponding code.

Wireless data transmission

Connect your measuring instrument to a PC via Bluetooth via wireless communication and transfer your data wirelessly to Microsoft Excel or another software application.

Order No.	Product	Measuring Range	Probe	Details	List Price	Promo Price
6910290	M 410 set	500 µm (±250 µm) with probe arm length 45 mm 1500 µm (±750 µm) with probe arm length 135 mm	2 µm probe supplied with set, 5 µm and 10 µm probes are optionally available	Storage capacity for min. 3900 profiles, 1500 PDF protocols and 500,000 results, expandable with microSD card up to 32 GB (increases the storage capacity by a factor of 320)	\$10,200	\$9,690

The MarSurf CD 140 AG 11 is **versatile** with an **intelligent probe system**

The MarSurf CD 140 AG 11 offers fast, precise measurements with a flexible workpiece holder for easy handling. Its versatility allows it to measure roughness ($R_a > 2 \mu\text{m}$), while the intelligent probe system and magnetic stylus tip holder enable tool-free tip replacement. The system offers a wide range of clamps and holders, and can be used both statically or directly at the workpiece. With a measuring range of 70 mm, stylus tips can be quickly replaced without recalibration.

Unique probe system

The probe system with a functional probe arm length of 350 mm enables a quick change of stylus tips without any tools and without having to recalibrate. The automatic measuring force selection guarantees the correct tracing force is selected when several different stylus tips are needed for different measurements.

Support plate for large components

The 390 mm x 450 mm large plate with 50 mm matrix of holes is also suitable for large-volume workpieces. This provides a variety of flexible clamping options.

Generous traverse path

The Y-axis can be adjusted manually with a traverse path of 60 mm.

Manual quick adjustment

The fine adjustment is located in the Z-axis and moves the drive unit up and down.

X-axis with maximum measuring range

The high-speed X-axis has a large measuring range of 140 mm.

Ergonomic carrying handles

The handles on the side make it easy to transport the device.

Compact and versatile for surface metrology

We have added the new MarSurf SD 140 AG 11 to our portfolio of manual surface measuring instruments: it can check both roughness and contour features – in just one stroke. This measuring station offers easy handling and reliable quality assurance thanks to its high functionality. It is therefore also a suitable entry-level model for stationary surface metrology.

The heart of the MarSurf SD 140 AG 11 is the new tactile probe system. This can record the measurements for roughness and contour at the same time, which the software then evaluates separately. The probe arm measuring range spans 10 mm (with 100 mm long probe arm) and 25 mm (with 250 mm long probe arm), and the positioning speed can be set from 0.1 mm/s to 200 mm/s via software.

The probe system's tool-free probe arm quick-change function also saves time, allowing you to quickly switch to another measuring task and doesn't require recalibration of the new probe arm. The electronic probe arm detection and automatic measuring force selection provide even more reliability. These guarantee that the correct probe arm is loaded and the measuring force is set correctly for the measurement task.

Advantages

- Measure roughness and contour in one stroke
- Tool-free probe arm quick-change function
- Electronic probe arm detection
- Automatic measuring force selection
- Defined start position with aligned axis
- Flexible clamping system: Support plate (390 mm x 450 mm) with 50 mm hole grid

Support plate with hole grid

Due to the special 50 mm on center support plate, you can use a wide variety of workpiece holders and clamps flexibly and quickly.
